EXECUTIVE SUMMARY

Enterprise AI Enablement, Governance, and Knowledge Systems Leader with 15+ years of progressive experience translating complex technology platforms, regulatory mandates, and multi-agent workflows into governed, scalable operations. Anchors technical execution in human adoption—bridging post-2022 Generative AI enablement, ISO/IEC 42001 (AIMS) governance, Policy-as-Code rules, and deterministic evaluation guardrails with deep foundational expertise in enterprise CCMS architectures (Paligo, DITA/XML), digital adoption platforms (Whatfix, Chameleon), and Agile Scrum leadership (CSPO, CSM). Architect of independent multi-agent RAG prototypes (QDD) and author of recognized technical blueprints across zero-spend agent orchestration (Hermes Desktop), enterprise AI governance, and automated docs-as-code CI/CD pipelines. Proven track record directing migrations of 170+ assets, driving automated support ticket deflection from ~15% to ~35%, and training engineering squads on AI-assisted workflows.

CORE COMPETENCIES & TECHNICAL KEYWORD MATRIX

- **AI Enablement & Governance:** Enterprise AI Adoption, ISO/IEC 42001 (AIMS) Auditing, AI Risk Assessment, AI Impact Assessment (AIIA), EU AI Act, NIST AI RMF, Policy-as-Code, Model Cards, Pre-Retrieval Authorization, RBAC Security.
- **Agentic AI & Orchestration:** Multi-Agent System Design (Planner-Executor-Critic), 7-Sub-Agent Sequential RAG, Hermes Agent, Model Context Protocol (MCP), Context Engineering, Low-Code Automation (n8n, LangFlow), Human-in-the-Loop (HITL).
- **Operations & Guardrails:** AI Operations (AIOps, LLMOps, AgentOps), Deterministic Schema Validations, Hallucination Guardrails, 20-Prompt Evaluation Scorecards, Non-Speculation Fallbacks, Drift Telemetry, Token Cost Optimization.
- **Knowledge Systems & CCMS:** Unified CCMS Ecosystems, Paligo CCMS, DITA/XML, Topic-Based Authoring, Metadata Taxonomies, Docs-as-Code (Sphinx, Markdown), REST APIs, OpenAPI/Swagger, Simplified Technical English (ASD-STE100).
- **Digital Adoption & Leadership:** Digital Adoption Platforms (Whatfix DAP, Chameleon), Learning Needs Analysis, Agile Scrum Delivery (CSPO, CSM), Cross-Functional UAT Validation, Ticket Deflection Analytics (~15% to ~35%), SOC 2 Compliance.

KEY ARCHITECTURAL & AI PROJECTS

- **QDD Multi-Agent RAG Knowledge System** *(Aug 2026 – Present | Independent Architectural Project)*
  Ideated and architected a 7-sub-agent sequential RAG pipeline (Context Monitor, Intent Ingestion, Clarifier, Confirmation, Authorize-First Retrieval, Audit & Verify, Solution Articulator) to resolve user intent gaps and eliminate hallucinations across enterprise self-service. Integrated Hermes Agent orchestration, pre-retrieval RBAC vector partitioning, and 20-prompt evaluation scorecards with automated 'Do Not Speculate' guardrails.

- **Enterprise AI Governance & Policy-as-Code Demonstration** *(Aug 2026 – Present | Practice Project (In Progress))*
  Engineered an ISO/IEC 42001 and EU AI Act-aligned compliance evaluation framework featuring a 4-tier risk classification engine and declarative Policy-as-Code rules (JSON/YAML) to deterministically validate model cards, licensing, and PII filtration before release.

- **Enterprise CCMS Modernization & Ticket Deflection (170+ Assets)** *(Aug 2021 – Sep 2022 | CleverTap Documentation Project)*
  Orchestrated the migration of 170+ enterprise documentation assets from ReadMe to Paligo CCMS using DITA/XML topic-based authoring and metadata taxonomies. Engineered Chameleon in-app walkthroughs and automated Zendesk pipelines, increasing support ticket deflection from ~15% to ~35%.

- **Marine Tech Digital Adoption & AI Editorial Review Program** *(Sep 2025 – Jul 2026 | JSM Consulting (Client: ABS Project))*
  Spearheaded enterprise AI enablement by formulating a 15-point AI editorial review checklist to train technical writers on responsible content acceleration. Architected Whatfix in-app digital adoption workflows for complex marine tech platforms (PTC Windchill PLM, IBM Maximo).

PROFESSIONAL EXPERIENCE (VERIFIED EMPLOYMENT HISTORY)

Architect Learning and Development (Consultant) | **JSM Consulting Inc. (Client: American Bureau of Shipping - ABS)** • *Sep 2025 – Jul 2026 (Hybrid)*

- **Spearheaded enterprise AI-assisted enablement programs:** directed the formulation and delivery of a 15-point AI editorial review framework, upskilling technical writers and engineering squads on responsible AI content acceleration.
- **Architected enterprise marine tech learning ecosystems:** designed unified guided workflows, compliance authoring standards, and Whatfix in-app digital adoption paths for complex marine tech platforms (PTC Windchill PLM, IBM Maximo).

Technical Writer – AI Platform & Developer Documentation | **Neysa (Neysa Networks)** • *Jun 2023 – Apr 2025 (On-site)*

- **Deconstructed cloud-native AI infrastructure architectures:** orchestrated developer onboarding frameworks, REST API/SDK references (Sphinx, OpenAPI/Swagger), and deployment playbooks for AI network monitoring platforms.
- **Enforced verified compliance boundaries:** governed technical documentation strictly within Neysa AI's verified SOC 2 Type II compliance controls, establishing audit-ready access policy playbooks.

Lead Technical Writer | **MoEngage** • *Oct 2022 – Jan 2023 (Remote)*

- **Directed SaaS developer enablement and content strategy:** spearheaded API and integration documentation roadmaps across bi-weekly release cycles, collaborating with product managers to streamline enterprise customer onboarding.

Manager Technical Writer | **CleverTap** • *Aug 2021 – Sep 2022 (Hybrid)*

- **Oversaw enterprise documentation operations and team mentorship:** directed content operations across Product, Engineering, and QA, establishing topic-based authoring and editorial quality standards.
- **Orchestrated 170+ asset CCMS migration and ticket deflection:** spearheaded migration of 170+ documents to Paligo CCMS (DITA/XML) and built Chameleon walkthroughs driving support ticket deflection from ~15% to ~35%.

Specialist Technical Writer & Scrum Master | **NICE Actimize** • *Sep 2020 – Aug 2021 (Remote)*

- **Engineered compliance documentation architectures:** authored comprehensive administrator guides and regulatory compliance frameworks for trading surveillance, AML, and financial-crime platforms.
- **Facilitated Agile Scrum delivery workflows:** served as Scrum Master facilitating sprint ceremonies, cross-functional risk assessments, and technical validation processes across engineering and compliance squads.

Team Lead | **HSBC Software** • *Aug 2018 – Aug 2020 (On-site)*

- **Directed enterprise information management and governance:** structured operational data workflows and integration pipelines ensuring cross-functional accessibility in a regulated banking environment.
- **Facilitated Agile release readiness and UAT validation:** coached Product Owners and developers on backlog refinement, quality control standards, and synchronization frameworks for enterprise data lifecycles.

Senior Consultant – Technical Communication & Agile Delivery | **Capgemini** • *Apr 2015 – Aug 2018 (On-site)*

- **Delivered scalable enterprise enablement programs:** spearheaded technical documentation, business process models, and SCORM e-learning courseware across global implementations for Fortune 500 clients, including IKEA, HUL, and HSBC.

Senior Associate – Technical Writer | **Opus Software Solutions Pvt. Ltd.** • *Aug 2014 – Feb 2015 (On-site)*

- **Engineered payment platform developer guides and APIs:** authored comprehensive API references, developer onboarding guides, and structured XML integration specifications for high-throughput banking payment switching engines.

Senior Technical Writer | **ibruk Consulting Pvt. Ltd.** • *Nov 2012 – Jun 2014 (On-site)*

- **Formulated modular product documentation models:** developed enterprise online help systems, software user manuals, and client content reuse models using Adobe FrameMaker, RoboHelp, and structured XML.

Technical Writer – R&D Department | **Gilbarco Veeder-Root India Pvt. Ltd.** • *Mar 2012 – Nov 2012 (On-site)*

- **Standardized industrial hardware operating SOPs:** authored technical operating procedures, field installation manuals, and safety compliance guides for industrial fueling and payment hardware systems.

Associate – Technical Writer & L&D | **Mphasis Limited (an HP company)** • *Nov 2010 – Mar 2012 (On-site)*

- **Built foundational structured XML software documentation:** developed software documentation, learner assessments, and interactive e-learning modules using the ADDIE instructional design framework.

CREDENTIALS, THOUGHT LEADERSHIP & EDUCATION

- **Published AI Technical Blueprints (LinkedIn Articles, 2025–2026):** Author of 4 recognized technical architecture articles: (1) 'Building a Zero-Spend Multi-Model Agentic Workflow: Hermes Desktop & OpenRouter'; (2) 'Beyond Checklists: What Does Real Enterprise AI Governance Look Like?'; (3) 'Treating Docs like Code: A Blueprint for Automated Documentation Pipelines'; (4) 'Four Years Since ChatGPT: We Don't Have an AI Problem, We Have a Judgment Problem'.
- **AI Governance & Agile Certifications:** ISO/IEC 42001 Lead Auditor (AI Management System – Knowlathon, Completing Nov 2026) • Certified Scrum Product Owner (CSPO) • Certified ScrumMaster (CSM) • Building Agentic AI for Documentation (Tech Writer's Tribe, TWTC No. 7328).
- **Formal Education:** Bachelor of Commerce (B.Com.) • University of Mumbai (2004).
